**Les solutions intelligentes...**  
*du transport urbain d'aujourd'hui !*

- Circulation
- Stationnement
- Sécurité routière
- Eclairage et affichage DEL
- Système de transport intelligent (STI)

[www.electromega.com](http://www.electromega.com)

Since its beginning in 1974, Electromega has established itself as a **Canadian leader in innovative technological solutions** applied to managing the mobility of **vehicles and people** in context of travelling or parked.

As for the value-added products that we offer and sell, we then distribute or manufacture them after having first tested their ability to integrate and adapt to the **intelligent solutions** that it advocates.

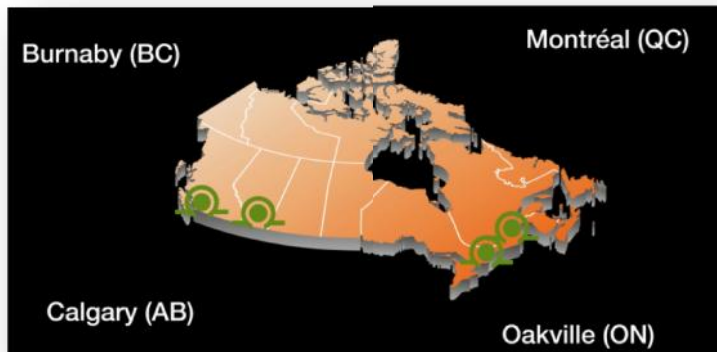

Our range of products, services and support cover five market segments:

- **Traffic**
- **Parking**
- **Road safety**
- **LED signs and lighting**
- **Intelligent transportation systems**

With our head office in Quebec offering a 50 000 square feet facility in the greater Montreal area and our various **Canadian branches** in, Ontario, Alberta and British Columbia, everybody works synergistically together.

They **inform, advice, train and support** our clientele in implementing technological solutions chosen based on criteria of efficiency, reliability, compatibility of new trends or technologies with very rational operating costs.

We are a leading provider in the **dynamic and static transportation field** across Canada in areas of traffic control systems (vehicle, transit and railroad), centralized traffic management system, data collection, detection systems (intrusive, non-intrusive and on-board), on street and off street parking systems, roadway security, dynamic or static LED message signs and also general LED lighting and luminaires.

ALL PROPOSED SOLUTIONS ARE ANALYZED UNDER THE PERSPECTIVE OF INTEGRATED INTELLIGENT TRANSPORTATION SYSTEMS TO MAKE THE LATEST AND MOST POWERFUL TECHNOLOGIES AVAILABLE FOR VARIOUS ENVIRONMENTS.

Our technical service team enjoys incomparable recognition by the industry experts as being one of the most dependable and professional in the market. The experience has been proven since a long time and the service calls are living up to its commitments.

Electromega deals only with competent, responsible manufacturing firms that share its values of uncompromising service. It doesn't hesitate to offer its service and distribution network to those who invest in research and development in order to always maintain its well-deserved reputation as a **Canadian leader of intelligent technologies to solve transportation and parking problems.**

*Electromega; experienced and solution oriented people since 40 years!*

## Our professional Services...

- ✓ Sales of products and solutions
- ✓ Engineering - Evaluation and recommandation
- ✓ Design and Integration
- ✓ Supply of equipment
- ✓ Training Seminar
- ✓ Traffic Network Coordination
- ✓ Technical Support
- ✓ Products and system maintenance

## Our Commercial Partners

Electromega selects its business partners, whose products and services it sells, based on stringent criteria related to quality, responsibility and ethics. It often subjects the products that it represents and sells, to quality controls and tests in order to always recommend proven products that provide more than superior price-quality value. Each of its installations is well documented to ensure constant, verified quality control.
